

Nomination & development of shared frameworks

Life cycle of a shared framework

- Goal: the proposed process will magnify OSF's effectiveness through a number of large-scale, time-limited initiatives that employ a range of strategies and tools.
- This collaborative work requires experimentation & adaptation as we go forward.
- Participation in shared frameworks will be a part of unit strategies.
- During the life of a shared framework, new units may join and other units may leave or increase their effort depending on their own priorities and the shared framework assessments.
- Assessment will focus on the outcomes of and unit contributions toward the shared framework, not on individual performance.
